

SOFT MESH TRELLIS NETTING

- ◆ White nylon mesh is strong, durable and long lasting.
- ◆ Install vertically or horizontally depending on your gardening application.
- ◆ Soft, non-abrasive mesh gently protects stems, vines and foliage.
- ◆ Ideal for guiding and supporting vine, flowering and vegetable plants.

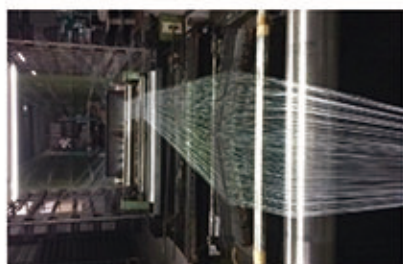

Application:

- Vegetables : tomatoes, beans, peas, cucumbers, squash, melons, gourds, etc.
- Fruit : grapes, raspberries, blackberries, and other vining fruits.
- Flowers clematis, climbing roses, sweet peas, morning glories, and other vining flowers

STG

BTG

• We use steel hanging hole instead of plastic one, it is very strong, so it won't be broken when drops down.

• We use reinforce unit to make the machine stronger.
Note: Though it is much stonger, better not drop the machine.

What is plant supports?

Plant supports are made of polyethylene or steel wire. The plastic plant supports feature mesh shape and metal plant supports feature different shapes and size based on plant growing requirements. They offer extra support for climbing plants and prevent plant from leaning when there is a heavy storm or a breakage. Besides, Using plant supports reduces the press to root and promotes the air circulation. Make plants grow upright, also look neat and beautiful. It can be used at garden, vegetables farm, indoors and outdoors.

BAMBOO STAKE

Naturally Strong, Naturally Beautiful Bamboo

- Lightweight, long-lasting bamboo is ideal for supports and structures
- A naturally beautiful landscape accent
- Several sizes to choose from

Smart gardeners know bamboo is strong, lightweight, inexpensive, weathers well and lasts several seasons in the garden. With a few simple tools bamboo poles can be fashioned into fences, frames, arbors, trellises – any structure you can imagine.
